

MontavueGo Desktop Setup

Once you have downloaded MontavueGo for your operating system, find your file in your downloads folder or where you save it and open it. Hit allow on the prompts that come up until you see the screen below:

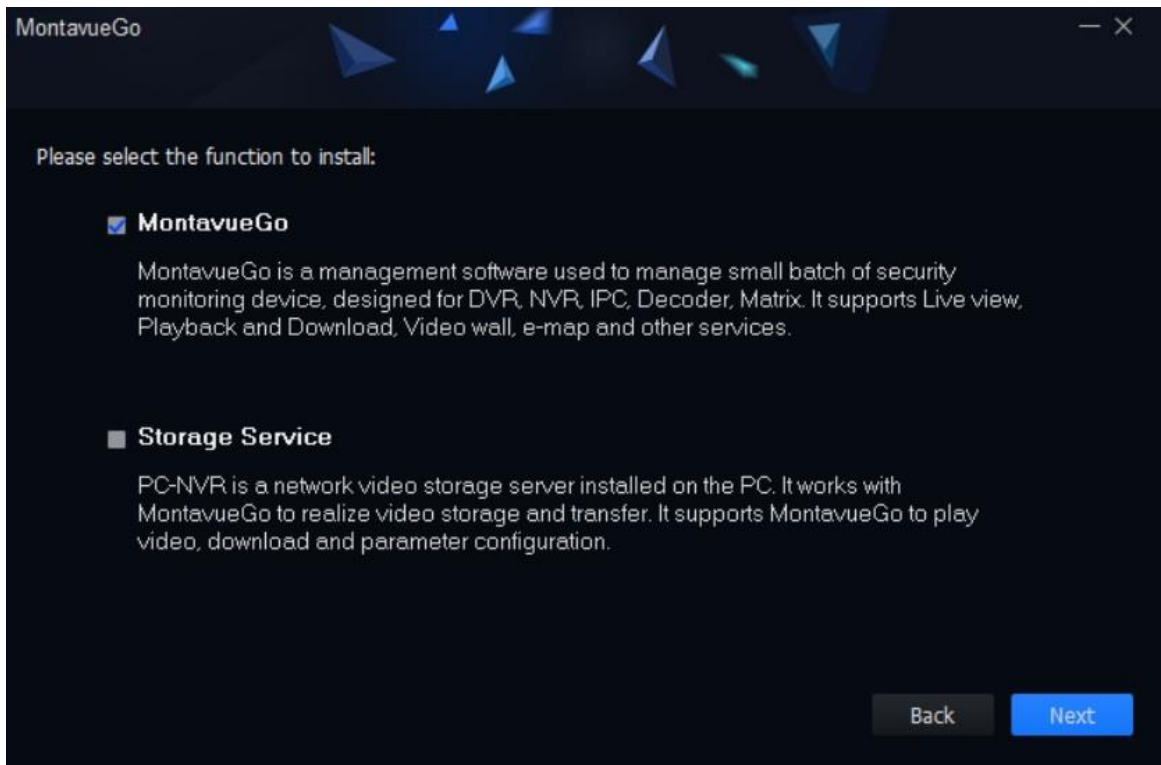

Be sure to select **I have Read and Agree** and then hit **Next**.

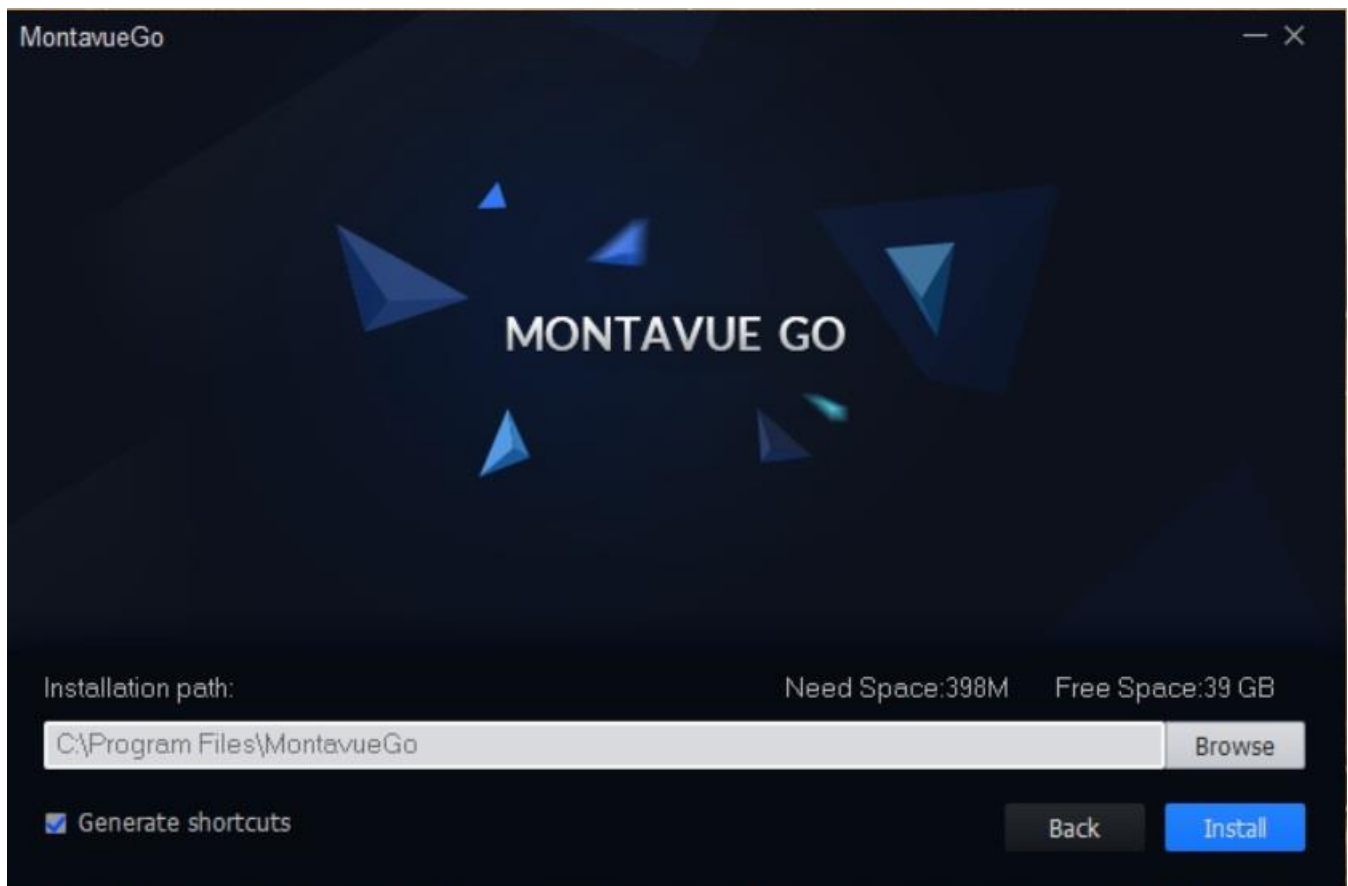

On the next page, you select what functions of MontavueGo you would like to install:

MontavueGO: For 99% of users they will download just this since it will allow you to see your cameras and do all the functions that an average consumer would need.

Storage Service: Please **uncheck** this before continuing.

Click next, then you will select which folder to install this to. Just leave it default, as is for the installation of the program and then proceed to install:

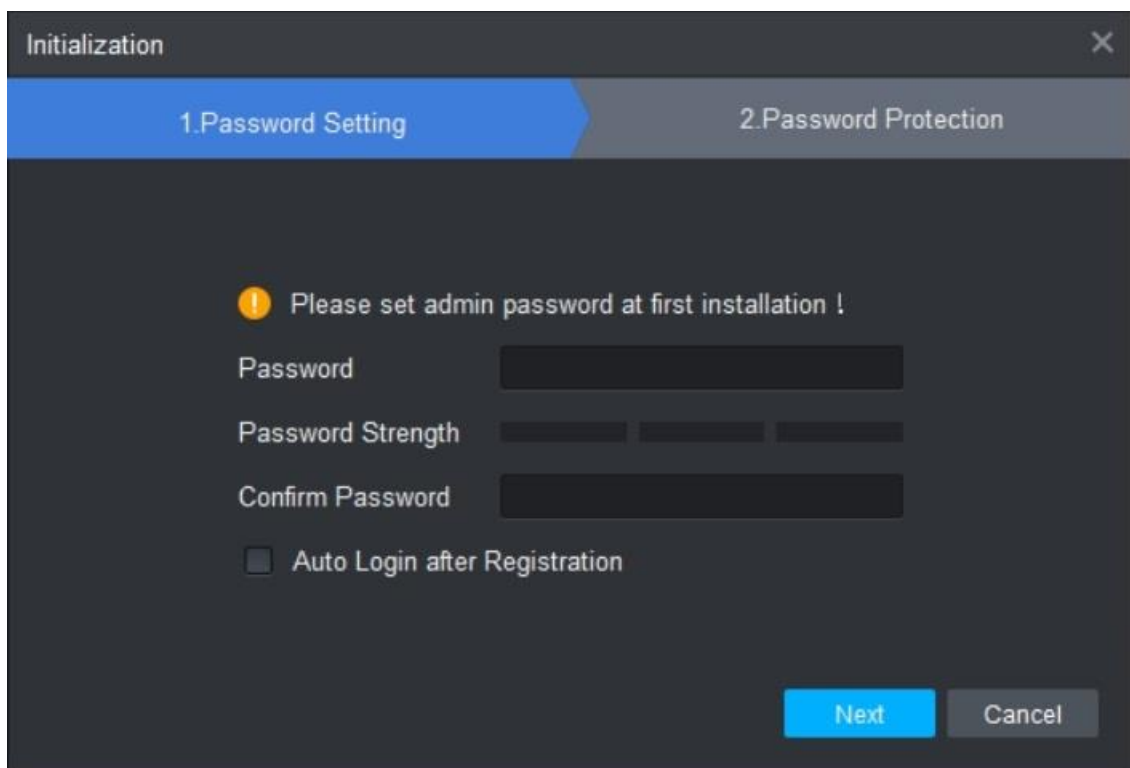

Once it's installed, you can check the box for Run MontavueGo in and then hit finish:
It will open up a new window with the initialization of MontavueGo for the first time.

This login is only tied to the computer you are using it on.

You can set your password and it must be at least 8-32 characters long, including 2 of either letters, numbers, or symbols.

After you set the password twice, **Remember** to set it to **Auto-Login after Registration** so you don't have to put in your info if you are the only user on this Computer.

Hit **Next** after you are done on this page:

The screenshot shows a window titled "Initialization" with a close button (X) in the top right corner. The window is divided into two steps: "1. Password Setting" (highlighted in blue) and "2. Password Protection" (greyed out). Below the step indicators, there is a yellow warning icon with an exclamation mark and the text "Please set admin password at first installation !". The form contains three input fields: "Password", "Password Strength" (with a progress indicator), and "Confirm Password". Below these fields is a checkbox labeled "Auto Login after Registration". At the bottom right, there are two buttons: "Next" (highlighted in blue) and "Cancel" (greyed out).

This next page you are going to be setting up security questions if you ever forget your password and you didn't set it to auto-login.

Please pick 3 questions and fill in the answers for each of them below. Then click finish.
